FROM: Head Air Navigation Standards & Air Traffic Controller Licensing Inspectorate
REF: Air traffic controller licences and certificates
DATE: 22nd August 2018

SUBJECT: NOTICE OF PROPOSED AMENDMENT (NPA ATCL/01/18)

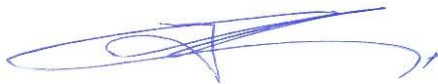

Please find attached the NPA ATCL/01/18 regarding the amendment to air traffic controller licences, medical certificates and training technical standards for your review and necessary action.

This NPA contains a proposal to amend technical standards applicable to air traffic controller licences, medical certificates and training for better compliance with the standards and recommended practices (SARPs) of ICAO Annex 1 – Personnel Licensing and to allow the Authority to use the European model, which better align with the ICAO SARPs, as a basis for establishing technical standards for air traffic controller licences, medical certificates and training. The proposed amendment involves a major change to existing technical standards.

It would be appreciated if the details of this regulatory material, as they apply to your specific area, can be assessed and comments presented using the comment sheet provided in this NPA. The closing date for comments is 22nd October 2018.

I thank you in anticipation of your comments on the proposed amendment and want to stress that no further action will be taken on the proposal until all comments have been received and addressed by the ANS & ATC Licensing Inspectorate.

My best regards,

Joseph G. Lajoie
Head Air Navigation Standards &
Air Traffic Controller Licensing Inspectorate
Safety Regulation Division
