SCAA USE ONLY

Unique Seychelles-code 15-character Hexadecimal ELT/PLB identification code:

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15

Annex A
Notes:

1. This form is to be used for registering 406 MHz Aviation Distress Beacons (ELT/PLB) that are coded with Seychelles country code 664.

2. Registration is FREE.

3. Information contained in this form is critical to your safety and to a successful Search and Rescue (SAR) response. The more complete your details, especially 24-hour contacts, the more quickly MCC and RCC personnel may be able to assist you in a time of distress.

4. You may use this form to register an Emergency Locator Transmitter (ELT) or an aviation-use Personal Locator Beacon (PLB).

5. When entering Information, you must include details in the following sections:

    •   Distress Beacon 15-character hexadecimal ID code and details (See Note)
    •   Reason for registration
    •   Owner / Operator details
    •   24-hour emergency contact details (minimum of 2 contacts, preferably 3)
    •   Aircraft details (when registering an ELT)

    Note: For GPS-integrated, location-protocol ELT/PLB, the default 15 digit code should be used.

6. Please give careful consideration to nominating the 24 hour emergency contacts. As far as practicable, owner / operator should nominate a 24 hour operational department such as Operations Control Centre. A typical 24 hour emergency contact should be as follows:

    Primary contact – Operations Control Centre
    Secondary contact – Maintenance Control Centre
    Tertiary contact – Duty Manager

7. Please complete electronically and send to:

    Technical Support Officer
